

Additional Technical Writing Samples - Procedures

Rebecca Ellis

Procedure 1: In-Monitor Camera Display

Objective: Display the camera feed on the current monitor mode's main channel instead of the site panel's video area when using an associated monitor.

Steps:

1. Accessing Associated Monitor: Utilize the associated monitor connected to the system.
2. Identifying Monitor Mode: Observe the current monitor mode indicated by the largest icon displayed in the top left corner.
3. Display Camera Feed: When a camera is active and should be displayed:
 - a. Ensure the camera feed is directed to the current monitor's main channel.
 - b. Avoid displaying it in the site panel's video area (site live panel, site Alarm Panel, or single site live panel).

Additional Details:

Site panels (live panel, alarm panel, single site live panel) can be referenced for further information about their functionalities and visual representation.

Procedure 2: Editing and Posting Pictures on Instagram

Objective:

Edit and publish pictures on Instagram using the app's functionalities.

Steps:

1. Accessing the interface:
 - a. Log in to the Instagram account.
 - b. Tap the '+' icon at the bottom of the screen to upload a picture.
2. **Select** and **Edit** image:
 - a. Choose an image from the device's gallery.

- b. Utilize available editing tools (filters, brightness, contrast, etc.) within the app.
3. Adding Details:
 - a. Write a caption, add tags, location, and relevant hashtags.
 - b. Review and make necessary adjustments.
4. Sharing Picture:
 - a. Tap 'Share' to publish the edited picture on the profile.

Topics Covered:

Accessing interface, uploading pictures, editing tools, adding captions/tags, sharing procedures

Procedure 3: Translating Terms into Swahili using Google Translate

Objective:

Translate words or phrases into Swahili using Google Translate.

Steps:

1. Access Google Translate:
 - a. Open the Google Translate website or mobile app in a web browser.
2. Select Languages:
 - a. Choose the 'From' language (source language) and 'To' language (Swahili).
 - b. Enter the term you want to translate into the left box.
3. View Translation:
 - a. Instantly view the translated term in Swahili in the right box.

Additional Options:

Utilize options like listening to pronunciation or switching languages for bidirectional translation.

Important Notes:

- Machine translations might lack precision; provide context for accuracy.
- Consider idiomatic expressions and multiple word meanings for accurate translations.

Topics hierarchy¹:

- 1. Accessing the live video feature**
 - Locating the live video feature within the app
 - 2. Starting a live video**
 - Initiating live video mode
 - Setting up title and customising settings
 - 3. During the live video**
 - Engaging with viewers
 - Interacting with comments and questions
 - 4. Ending a live video**
 - Concluding the live session
-

Procedure 4: Using Bandall Banding Equipment with Custom Arch

Objective:

Operate the Bandall banding equipment with a custom arch effectively.

Steps:

1. Starting the equipment:
 - a. Turn on the banding machine.
 - b. Insert the carpet or matt roll into the machine.
2. Banding process:
 - a. Position the roll over the sensor for banding.
 - b. Allow the sensor to measure the roll's diameter and trigger banding.
 - c. Shift the roll to the desired banding position and repeat the process for additional bands.
3. Ending process:
 - a. Remove the roll after banding all required sections.
 - b. Turn off the banding machine.

Additional Tips:

- Address sensor activation in detail for clearer understanding.
 - Use diagrams, user manuals, and expert insights to enhance explanations.
-

API Reference: PLAY Request for Online Gambling

¹ Topics parents are enumerated, topic children are denoted with ‘-’

POST

/games/{gameId}/play

Sample Request Payload:

```
{
  "stakeValue": {
    "cashBet": 0.10,
    "currency": "EUR",
    "coinBet": 0.10
  },
  "freespinsActive": false,
  "jackpotStakeValue": 0.1,
}
```

Includes stake details, free spins status, and jackpot contribution.

Purpose:

Describe the PLAY request used by an online gambling company for initiating gameplay rounds.

Endpoint:

POST /game/play

Parameters:
